

MODERNIZE YOUR WELL MANAGEMENT

Grooper is the world's only unified software platform capable of automating the management of your well documentation and expose content to help you make better, faster decisions that dramatically speed up the return on your investment!

With increased cost pressures and an ever-increasingly competitive landscape, Grooper delivers the results of a large staff through the efficiency of software – automating the work without giving up quality – letting the people you have focus on making decision instead of digging out data.

Simply put, Grooper gives you the strategic edge by keeping costs down while unlocking the knowledge contained within all your documents and files.

How Grooper Delivers:

- **Well File Standardization**
 - Automated analysis and classification
 - A comprehensive platform for quick Acquisition & Divestitures (A & D) turnaround
 - Enables you to link existing documents from *any* source (paper, electronic, email, etc.) to Master Well ID, API#, and more.
 - Make all your documents quickly and easily searchable and retrievable
 - Truly Structured Electronic Well Files
- **Automated Oil and Gas Lease and Title Analysis**
 - Accelerated knowledge on leases
 - Discovery tool for terms, conditions, costs and more
 - Gain competitive insight on where leases are located
 - Grooper becomes your Virtual Landman
- **Non-Operator Well Data Processing**
 - Automates data capture from daily reports
 - Data is ingested and mapped to Well Data Management Solution (Wellview)
 - Capture more data and gain business insight to “dark data”
- **Oil and Gas Marketing**
 - Auto-Classification of Purchaser Statements – Received Electronically or as Scanned Images.
 - Automated Data Extraction and Export to Accounting System.

Grooper - transform your documents; extract and normalize your content and information; accelerate business insight.
