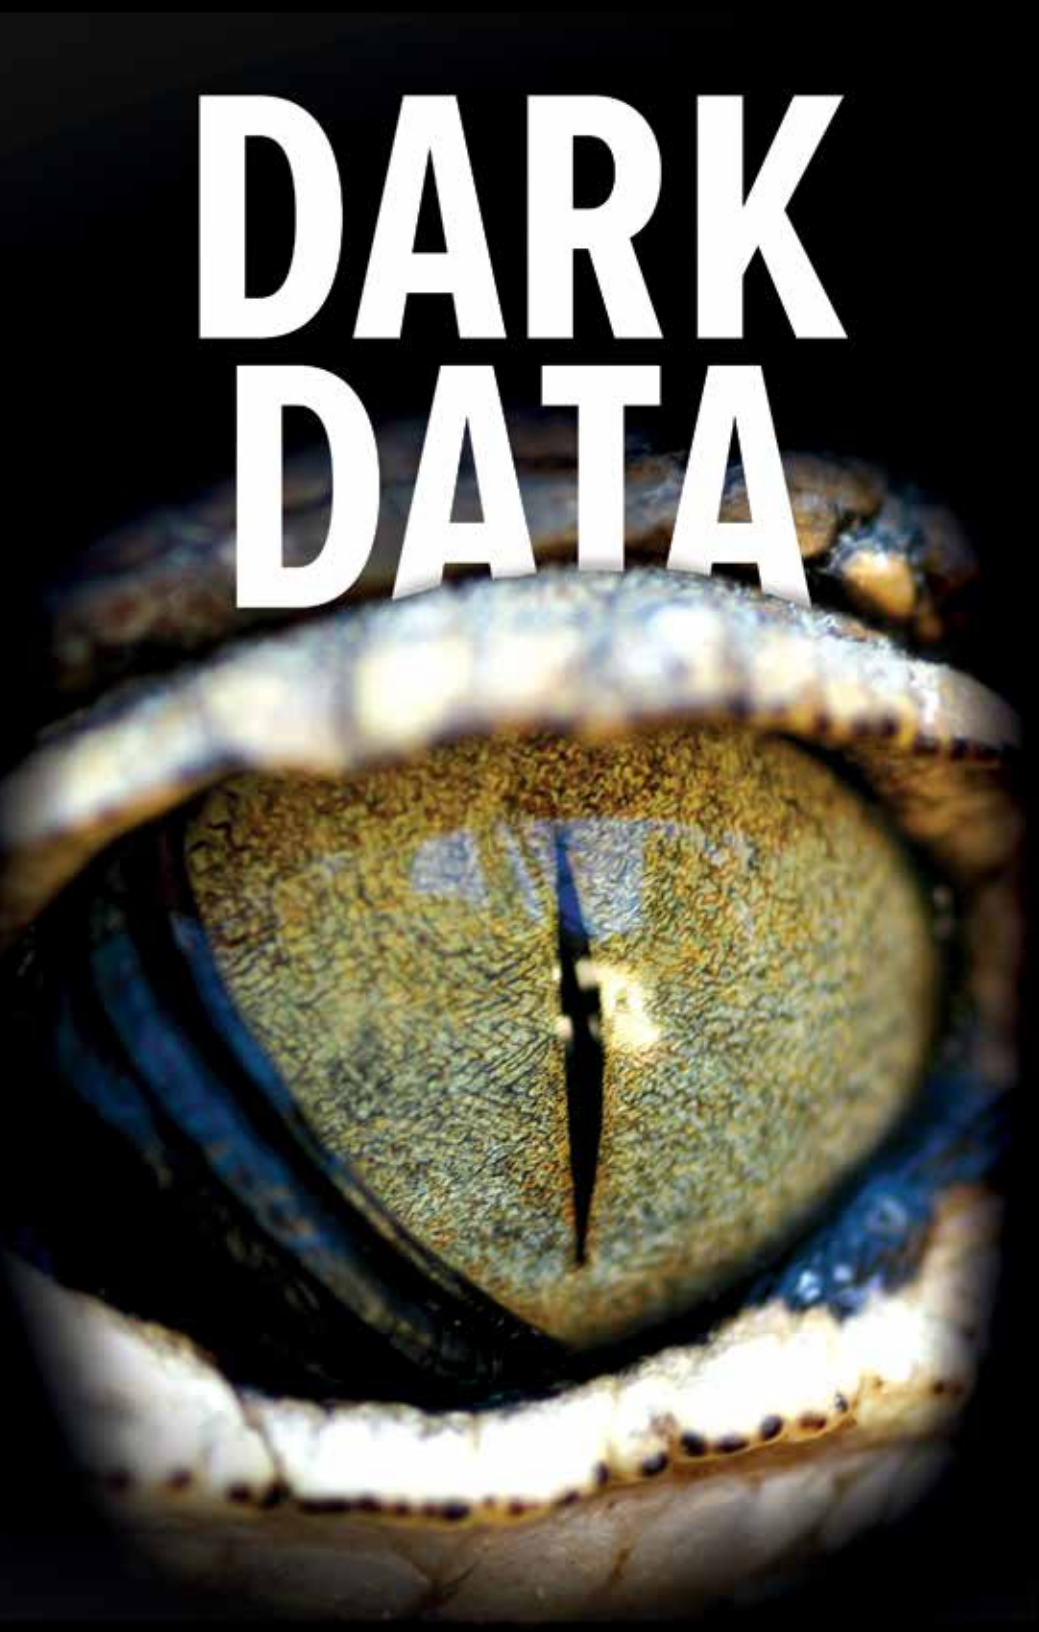
Grooper™ Be Wise With Your Data

The world's only unified software platform that **transforms** documents, extracts and normalizes content, and delivers information to accelerate business insight.

BIS

DARK DATA



According to a recent study, more than 80% of all data is dark - inaccessible and unstructured.

That same study estimates that number will rise to 93% by 2020.

This means we will rely on less than 10% of our knowledge, analytics, and information in order to drive business!

Access to your company's dark data and making it actionable and valuable are the keys to:

- Growing revenue and customers
- Saving time and money
- Improving organizational efficiency
- Guaranteeing the long-term viability of your organization
- Building customer and client trust
- Being a more proactive business

CIO Magazine describes dark data as 'vast pools of untapped, largely unprotected data,' which represent a huge, unused resource for most organizations.

Grooper exposes the dark data trapped inside your organization's unstructured content and enables you to use it.

Grooper™ www.grooper.us

- Dynamic Intuitive Learning
- Natural Language Processing
- Ultra-High Volume Parallel Processing
- Computer Vision
- Pattern Recognition
- State-of-the-Art Fuzzy Matching and Patented OCR

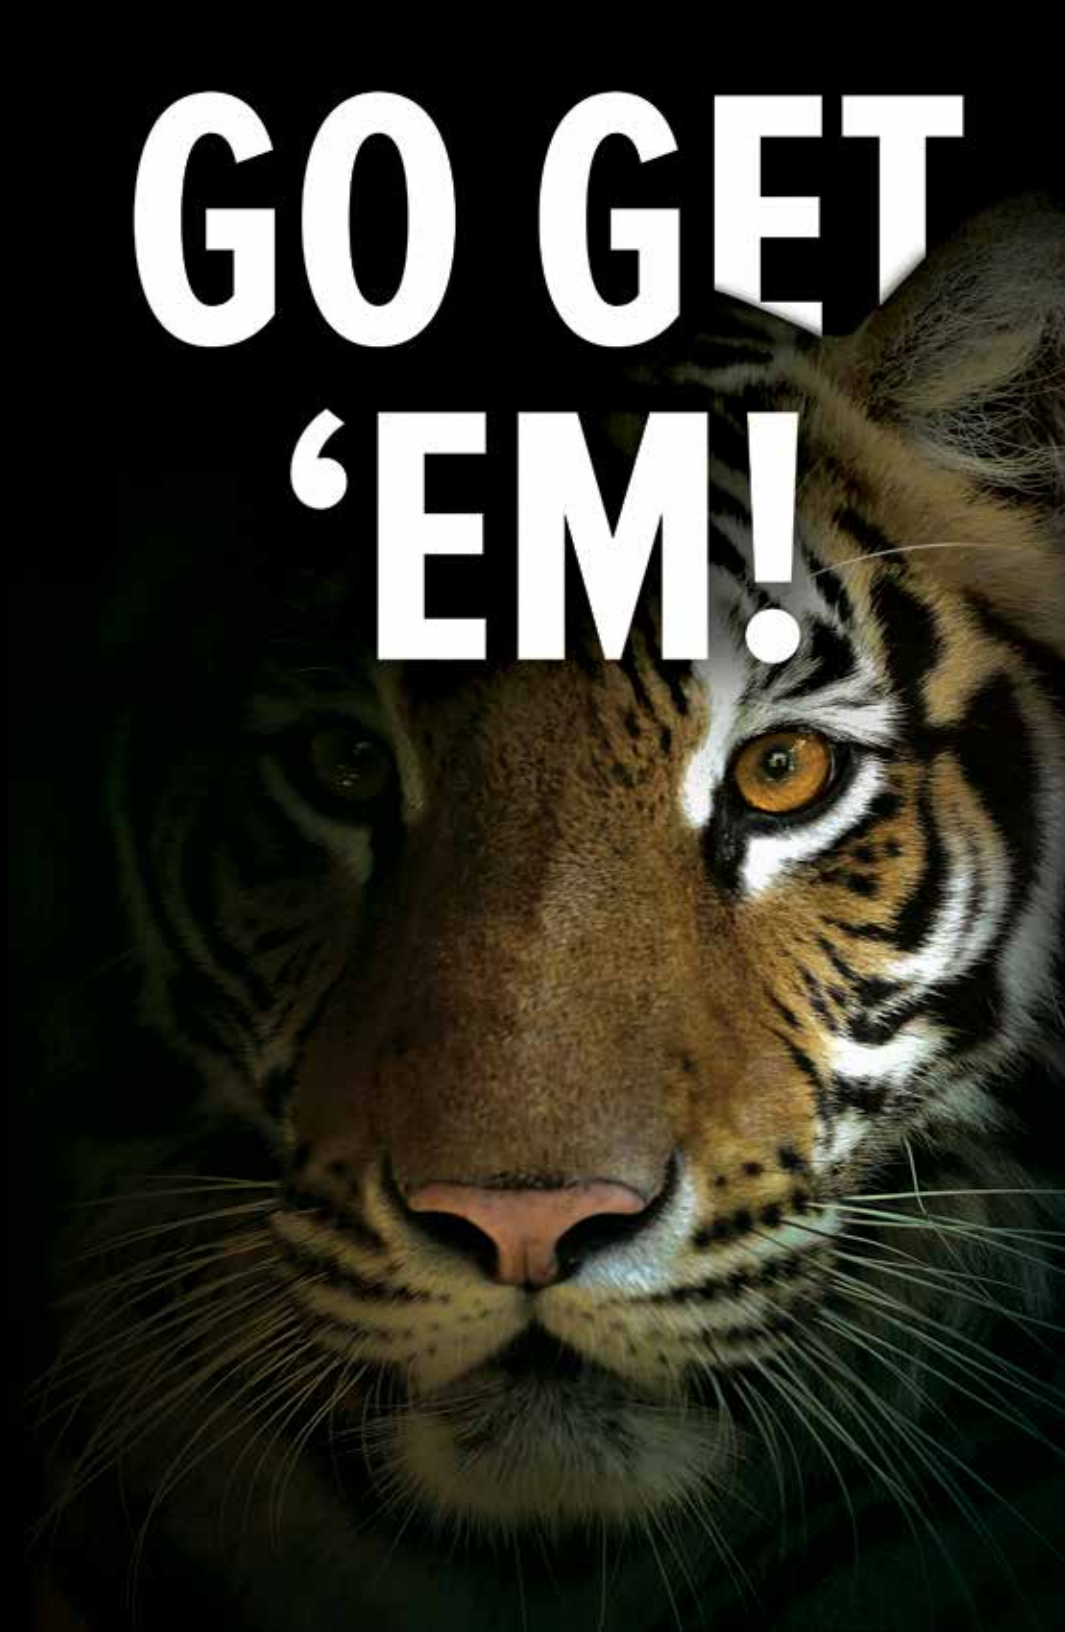
Much of your data is inaccessible and unorganized. What solutions are out there to help your business gain access to your data, index it, normalize it...and make it useful to you?

Grooper is the world's only unified software platform that transforms your documents and normalizes your data to accelerate business insight, and improve your business processes.

Grooper is built using state-of-the-art technology to revolutionize automated recognition and comprehension of information – regardless of the format in which it resides – providing you with unparalleled access to the business intelligence contained within your organization.

Grooper™ www.grooper.us

GO GET 'EM!



Grooper provides your organization with 360° visibility into your document content, regardless of its format or the platform on which it resides. Legacy platforms can only process a small percentage of content.

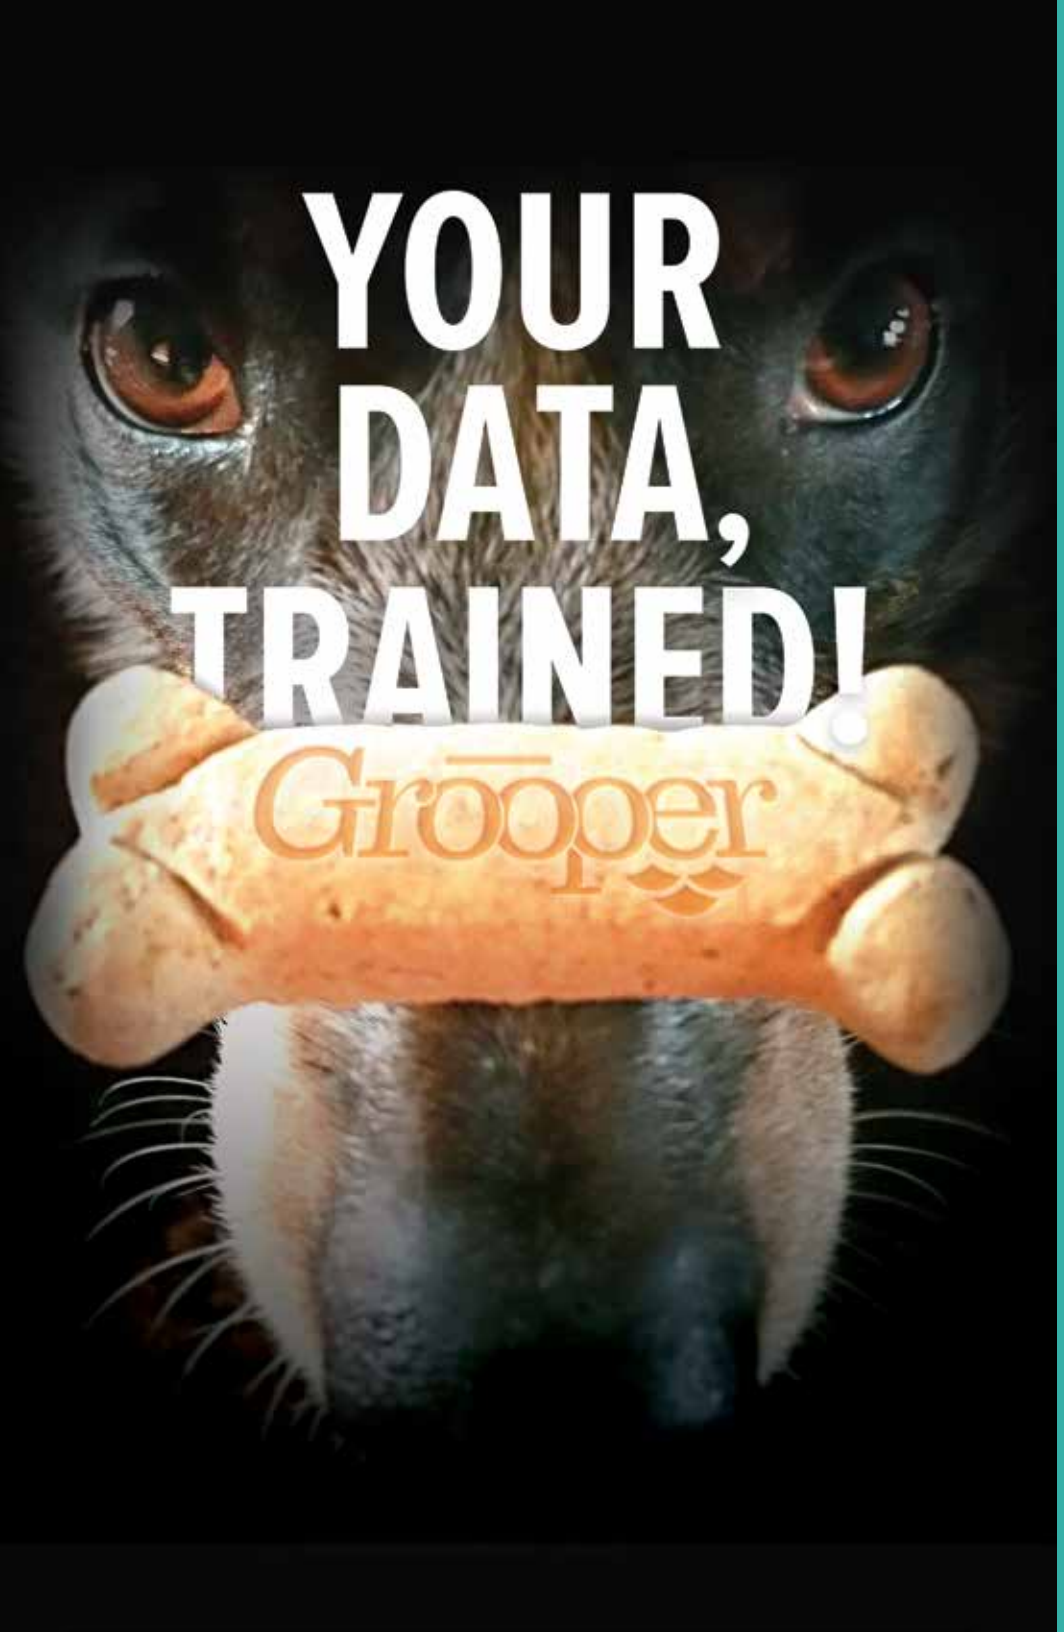
Grooper comes ready and integrates with more than 400 document scanners and provides bidirectional document interchange with nearly 50 enterprise information management systems.

Grooper rewrites the book on image processing, information classification, data capture, and integration with existing systems and applications.

Your organization is sitting on a stockpile of unstructured, unusable, but valuable data.

Harness the power of your unstructured data with Grooper's enhanced ability to classify and extract information, including industry-specific terms, phrases, language, and content.

Grooper™ www.grooper.us



Grooper delivers meaningful electronic document processing and erases the lines that existed between scanned images and digital content. With Grooper, you have the ability to manage all your digital assets from one unified platform.

In another shift from industry norms, Grooper provides bi-directional document interchange with all major enterprise content silos.

- Import electronic documents from any enterprise content management system (ECM); migrate documents from one system to another; perform bulk processing, such as redaction of sensitive information, along the way.

- Import documents from any email provider or access the information contained in your company's existing or obsolete email server(s).

- Access files from system or network folders, filter based on size, path or metadata, and extract valuable information.

- Monitor and ingest from SFTP sites and/or daily reports to extract valuable information for different business units.

Grooper™ www.grooper.us

TRANSFORM YOUR BUSINESS

- **Energy, Oil & Gas** Grooper automates management of well documentation, standardizes well files, automates oil & gas lease and title analysis, automates data capture from daily reports, and improves oil & gas marketing via auto classification of purchaser statements.
- **Government Agencies** Grooper improves services to constituents by modernizing workflow and refining the way vital documents are indexed, classified, and retrieved.
- **Banking, Finance, Lending** Grooper processes paperless loans compliantly and efficiently. Say goodbye to manual separator sheets that bog down the process of identifying documents. Grooper can extract and validate more data to complete loans faster and more accurately.
- **Education** Grooper can process transcripts, report cards, financial aid documents, and other vital student data - all of which can help schools enroll more students and return acceptance letters faster.
- **Healthcare** Laws affecting healthcare can be overwhelming. Grooper's ability to learn forms, automate processes, capture patient data (whether on paper or electronic), redact sensitive information, and store records on a single, secure platform helps healthcare organizations improve patient care and remain compliant.
- **Accounts Payable** Grooper takes paper-centric A/P procedures, automates them, and rapidly improves the efficiency of A/P departments. A Grooper-powered A/P Automated Workflow System will significantly lower processing costs and time per invoice, reduce the frequency of exceptions, and deliver problem-free processing.
- **Human Resources** Regardless of the organization or its size, HIPAA and other workplace regulations affect how to handle and process employee information. A Grooper HR solution can streamline procedures, such as managing applicants, administering benefits, even recruiting the best talent. Grooper modernizes ways to select, hire, train and retain talented people!
- **Retail** With precious inventory to control, even at multiple locations, Grooper has the ability to keep up with the demands of the busiest of retail environments. With online shopping and price savvy consumers continuing to rule the retail world, most POS systems struggle to keep up. Grooper interfaces seamlessly to keep you ahead of the competition
- **Manufacturing & Distribution** Producing and shipping goods is complex. There are incoming and outgoing manifests, bills of lading for clients across the country, and the never-ending pursuit for the highest quality production. Grooper streamlines your busy operation and improves quality assurance/quality control processes. Grooper can also help you go paperless!

Grooper as a Service (GaaS)

Put your data and information to work for you! With Grooper as a Service or GaaS, the world's most sophisticated software platform can release locked, unstructured data and deliberately transform it into valuable, actionable information for your organization.

- **Oil and Gas Lease Data Analysis** With GaaS, we automate the extraction of dozens of necessary, decision-making data elements in a matter of hours or minutes. GaaS is helping companies that make large acquisitions to identify the value and obligations of their new assets.

- **Non-Operator Oil and Gas Joint Ventures** GaaS removes the manual effort of consolidating Daily Drilling Reports and Gas Purchaser/ Percent of Proceeds (POP) Statements from multiple operators/producers by compiling it into a streamlined process. You can then ingest YOUR data directly into your well log management and accounting systems.

- **Financial Information** If you've ever produced loan documents, you know how important it is to be compliant with Truth-in-Lending regulations. With GaaS, we ingest your documents, spotlight any irregularities, help repair them, and communicate with your customers and members.

- **Accounts Payable (A/P)** With GaaS, your A/P solution will significantly lower processing costs and time per invoice, reduce the frequency of exceptions, and deliver problem-free processing.

- **Explanation of Benefits (EOBs)** Grooper collects important benefit information from these complex statements, making approvals, reconciliations, and payments quicker and easier to process.

- **Transcript Processing** Grooper efficiently gathers course information from complex documents, which can span several columns and pages. Grooper understands how data flows and gathers it seamlessly. Grooper can also verify all course data and calculate grade point averages by course, semester, and complete transcript.

- **County Government** With GaaS, we scan paper or ingest digitally filed court records (Oil & Gas Leases, Deeds, Mortgages, Memorandums, Powers of Attorney and much more) to help you easily search and provide better service to the citizens in your county.

So with GaaS, you can leave the business intelligence and discovery to us – we'll turn it all over to you in a format that can be easily imported into your line of business application.

AGILE
CAPABLE
EFFICIENT

Grooper is the smartest way to help your business capture, extract, classify, index, normalize, and utilize your company's vital data.

Grooper is all-new and designed from the ground up to be highly agile, capable, and efficient. Gone are the days where you'll be "taxed" for expensive add-ons just to have your software perform the way it was sold to you.

Get the ROI you were promised. In today's environment, information and agility are more critical than ever! With Grooper, you'll empower your organization to make informed decisions because your data is now usable and actionable.

Free your data! Schedule a complimentary Grooper demo or learn more about this latest innovation from BIS.
